

BILLBOARD STRUCTURES WITH DIGITAL LED FACES

Since 1983, Jones has fabricated and installed advertising structures for outdoor advertising companies, property developers and end users all over the country. We've done structures up to 240' tall and some scoreboards have been over 4000 sq. ft.

We have installed every brand of scoreboard, LED board and trivision on the market. We know adverse site conditions and how to overcome them. [We have some amazing stories].

Our experience will save you money. When the project is large, specialized or difficult that is where our know-how will really save you headaches.

From design and engineering to fab and installation – we are up to the challenge.
