

WHY WASTE A SIGN?

In these difficult financial times many underperforming locations will be closing. Unfortunately, de-identifying locations may be necessary, **but what is unnecessary is wasting the signage.** Jones will document the signage measurements provide digital photos, remove the signs carefully, crate the items and store them for use at a future location. All for a cost that is not much more than you would pay to just have the sign taken down and scrapped.

Got locations? Let us quote. You will certainly open locations in the future, wouldn't it be great to have signs which require just minor refurbishment and installation?

Jones is a full service sign manufacturer. We can design, fabricate, install and service any sign type. We know all sign materials and methods. We can make a sign for you that will last 3 weeks, 3 years or 3 generations. We have been in business since 1910.

If you decide not to save and refurbish, Jones will dispose of the sign materials responsibly -recycling all elements that can be.
