Fox Valley Technical College Updates Sign Image

Jones Sign is installing a new highway sign for Fox Valley Technical College at their main campus along Highway 41 in Appleton, Wis. This 60' sign features all energy-saving LED lighting and is made from all recycled aluminum, steel and plastic, while exhibiting a full-color electronic message center, halo-glow letters and the FVTC logo, all lit with low energy LED fixtures.

Jones Sign also announces construction has began on a 105,338 square feet addition to Jones Sign Company's plant in Lawrence, Wis. The addition allows increased manufacturing of custom lighted signs, as well as the addition of grand-format digital printing operations and in-house LED sign assembly.

Sign Business adds to family

Amanda McGrory joins the Sign Business team as staff writer. Her current duties include writing articles relating to latest industry trends, technologies and functions within the signage industry. Previously, McGrory worked as a marketing writer in the pharmaceutical benefits management industry.

McGrory is a graduate of Baylor University with bachelor's degrees in journalism and history.

Roland Announces the Roland Express Open House Tour

The 2008 Roland Express Dealer Open House Tour is traveling through the United States and Canada,

bringing Roland Pure Print Performance to digital printing professionals across the region. Roland Express events are designed to showcase the entire Roland line of wide-format inkjet printers and printer/cutters, including VersaCAMM, SOLJET, AdvancedJET, Hi-Fi Express and Hi-Fi JET Pro II models.

For complete information and an updated schedule of Roland Express events in your area, visit the Roland Web site at www.rolanddga.com.

EFI continues inkjet investments with Jettable LTD

EFI announces it has completed an investment in Jettable LTD, an inkjet technology company specializing in digital printing onto ceramic substrates. Based out of Netanya, Israel, Jettable's product portfolio will add to the suite of inkjet solutions offered by EFI, including the VUTEk (superwide inkjet for the display graphics market) and Jetrion (digital inkjet for the labels and packaging market) products, as well as investments in Kornit (textiles market) and Raster Printers (which compliments VUTEK by specializing in the midrange wide format space).
